

VoIPoM for Repeater Phone Patch

Written by Jim Kinter, K5KTF - Last Updated Monday, 15 December 2014 09:00

Those of you who have seen this page before may notice that it has changed !

Changed from an idea to Documentation!

I have successfully integrated the phone patch of an SCOM 7K repeater with a Grandstream HT286 ATA adapter and a mesh node. The HT286 has less than a preferred web GUI for setup, but if you are persistent, you can get it set.
